

BAI IS A TEAM OF

Security Architects

Focused on Automated Detection, Prevention, and Orchestration. Our products and services protect Government Agencies, Higher Education and Fortune 1000 commercial accounts against targeted attacks while creating more highly available, responsive, and automated networks.

SECURITY ARCHITECTURE

BAI designs and constructs network and application architectures to promote best practice security while optimizing business continuity.

PREVENTION

BAI works with a select group of partners to enable highly efficacious detection and prevention of advanced threats across all industry vectors.

ORCHESTRATION

BAI enables solution synergy through the creation of an abstracted orchestration platform that enables provisioning of hardware, automation of repetitive tasks and facilitates real-time security response.
